## How This Course Will Work

### How is this course set up?

1. deep look at JavaScript code organization
2. basic computer science concepts
3. a primer on creating and using a test suite for your project
4. last thing is a project which integrates everything you've learned so far (will be added to portfolio)

### What is the format of each lesson?

1. We will introduce the topic briefly and provide you with a list of things you should pay attention to.
2. You will be asked to do readings, watch videos, do online courses or otherwise consume content to initially learn the material.
3. Every few lessons you will be asked to build a larger project.
4. Finally, we will include supplemental resources and other potentially useful tidbits at the end of each lesson.
